

RFP #1985 and RFP #1986 Questions and Responses

1. Is DBT training a requirement to receive this RFP? If it is required, what is the timeline to have staff trained? – Prior training in any of the expected EBPs including DBT is not a requirement to receive the award. The response should indicate the number of staff already trained (if any), the number of staff expected to be trained, and any agency needs related to training, for the expected EBPs.
2. Question related the Cost Proposal Budget and the Rates
 1. Will we submit billing at the approved rates (\$52.80 per day for Residential, \$8.43 per unit, etc.) through the Electronic Health Records and then use those revenues/income to pay for what we are “budgeting” in cost proposal budget? - Attachment B – Cost Proposal is for Offeror to report any one-time or start-up costs. Only complete Attachment B to outline start-up or one-time costs. Reimbursement will occur with the submission of 837 files under the current rate reimbursement structure. If any, one-time costs reimbursement will be negotiated.
 2. Or will we submit for reimbursement some other way? – See response in 2.1.
3. Is this grant just for 11 months? July 2020 – May 31, 2021? - This is not a grant opportunity. Funding has been allocated to expand treatment services on an ongoing basis with annual contracts.
